Summary

Computer Science undergraduate at PIEMR with experience in MERN stack development, AI-powered full-stack applications, Machine Learning, and Generative AI. Skilled in building scalable web applications, integrating AI models and APIs, and developing intelligent software solutions. Familiar with cybersecurity fundamentals and IoT technologies, with demonstrated technical leadership as Founder President of DevLeague and AWS Student Builder Group Leader.

Experience

Software Engineer Intern — EventDhara *Feb 2026 – May 2026*

- Developed AI-powered web solutions for event planning and decoration workflows.
- Integrated Large Language Models (LLMs) and AI APIs to automate content generation and improve user experience.
- Built responsive frontend interfaces and collaborated on backend integration using modern web technologies.

AI Web Development Intern — InAmigos Foundation *Jun 2026 – Jul 2026*

- Developed AI-powered web applications using React, Tailwind CSS, JavaScript, and modern development workflows.
- Integrated AI APIs and implemented responsive, user-centric interfaces for real-world applications.
- Collaborated with developers to build, test, and optimize scalable web solutions following industry best practices.

Founder & President *Apr 2026 – Present*

- Founded DevLeague (DSA Campus Chapter PIEMR), a student developer community focused on DSA, software development, and hackathons.
- Built and managed a community of 100+ students across multiple academic branches.
- Mentored students in competitive programming, project development, and hackathon participation.

AWS Student Builder Group Leader *Jun 2026 – Present*

- Selected as the AWS Student Builder Group Leader at PIEMR to promote cloud learning and technical community growth.
- Guided students in exploring AWS services, cloud fundamentals, and modern development practices.

Projects

CineMind: AI-Powered Movie Recommendation System GitHub

- Developed a machine learning-based movie recommendation system that delivers personalized movie suggestions using collaborative and content-based filtering techniques.
- Built an interactive web application enabling users to discover movies based on preferences, ratings, genres, and similarity analysis.
- Designed an end-to-end ML pipeline covering data preprocessing, feature engineering, model training, evaluation, and deployment.
- **Tech Stack:** Python, Scikit-learn, Pandas, NumPy, Streamlit, Machine Learning.

KEKAI: Autonomous Brand Intelligence & Impersonation Engine Live Demo

- Developed an autonomous cybersecurity platform for detecting and analyzing brand impersonation across suspicious domains, webpages, and digital assets.
- Implemented multi-signal detection combining domain intelligence, visual/logo similarity, and contextual analysis to distinguish legitimate assets from potential impersonation attempts.
- Generated explainable risk assessments and evidence-based reports to support investigation.
- **Tech Stack:** Python, React, AI/ML, Computer Vision, NLP, APIs, Git.

Education

2024 – 2028	**Bachelor of Technology (B.Tech), Computer Science Engineering (CSE-IoT)**	Expected 2028
	Prestige Institute of Engineering Management and Research (PIEMR), Indore	CGPA: 7.7/10
2024	**Senior Secondary (Class XII)**	73.6%
	Marthoma Public School	MP Board
2022	**Secondary (Class X)**	71.3%
	Marthoma Academy	CBSE

Achievements & Awards

- **Special Mentor's Choice Award – Cybersecurity Track, IKIGAI** 2026
  Award received at a 36-hour national-level hackathon for developing a cybersecurity solution.
- **Top 13 Finalist - MUJ HackX - 36 Hour International Level Hackathon** 2026
  Among 1,000+ competing teams in an international hackathon conducted by Manipal University Jaipur.
- **1st Position – Wire Wars** 2025
  Circuit completion competition organized by the Department of Electrical Engineering, PIEMR.
- **2nd Position – Creovate** 2026
  National Mathematics Day software development competition conducted at PIEMR.
- **3rd Position – CodeStorm** 2026
  Programming and software development competition organized by AI Club PIEMR.

Technical Skills

Programming	C++, Python, JavaScript
Web Development	HTML5, CSS3, Next.js, React.js, Tailwind CSS, MERN Stack
AI & ML	Machine Learning, NumPy, Pandas, Scikit-learn, NLP, Generative AI
Cybersecurity	Network Fundamentals, Linux Fundamentals
Backend & APIs	Node.js, FastAPI, REST APIs
Databases	Firebase, MongoDB
Core Subjects	Data Structures & Algorithms, OOPM, Operating Systems
Developer Tools	Git, GitHub, Docker
Soft Skills	Leadership, Problem Solving, Teamwork, Communication

Activities & Leadership

- **Overall Student Coordinator – AGNITIA 2026**
  Organized AGNITIA, a 36-hour national-level hackathon and flagship event of PIEMR, attracting participation from 95+ colleges and 1,000+ participants across India.
